

DETRAX

Liquid Soap

DESCRIPTION:

DETRAX is a concentrated water based detergent designed for the removal of our TRAXOL product line.

It has been formulated with biodegradable surfactants and water softeners. DETRAX can be used in hot or cold water, soft or hard water areas.

DETRAX will also effectively remove greases, oils and open gear lubes commonly found on heavy equipment. It combines the cleaning properties of several ordinary cleaners into only highly versatile product.

BENEFITS:

- * Formulated with biodegradable surfactants for more environmental acceptability
- * Highly cost effective dilutions
- * Non-caustic and safe to use on painted and aluminum surfaces
- * Versatile product that replaces several others
- * Effective in hard or soft water areas; no further softeners required

APPLICATION:

DETRAX is a pressure washer liquid or can be used for general all-purpose cleaning. It should be used in hot water for optimum performance. With cold water more product will be required to achieve the same performance.

DIRECTIONS:

DETRAX is typically diluted 1 part product to 50 to 100 parts water. For light cleaning use 1 part product to 100 to 200 parts water. For heavy-duty cleaning mix 1 part product to 30 to 50 parts water.

TECHNICAL INFORMATION:

Physical State:	Liquid	Appearance:	Clear red
Odor:	Mild	Specific Gravity:	1.10
pH:	10 (Concentrate)	pH:	9 to 9.5 (1% Solution)
Storage:	Stable under normal conditions of storage and use. This product should not be allowed to freeze as it will be permanently damaged or deposit crystals will form, which will not readily dissolve at room temperature.		
Composition:	Alkaline solution with biodegradable surfactants, phosphates, chelating agents and silicates		

For further technical data, safety or first aid measures, please refer to the Material Safety Data Sheets (MSDS).
